How does Emerald Laser work?

Emerald Laser Machine uses low-level laser technology to reduce fat in specific areas of the body. It uses a specific wavelength of green laser to irradiate the fat cells under the skin. The laser energy penetrates the skin and reaches the fat cells, causing the fat cells to close into tiny holes. The fat fluid in the fat cells seeps out from these holes and is naturally discharged through the body's lymphatic system. Without destroying the fat cells, the volume of the fat cells is reduced and fat accumulation is reduced.

Emerald Laser Machine's non-thermal laser technology does not cause thermal damage to the surrounding tissues, so there is no discomfort during the treatment, and there is no recovery period. Patients can immediately return to normal activities after treatment.

How Does 10D Maxlipo Master Laser Compare to Other Treatments?

10D Maxlipo Master Laser has a number of benefits that traditionalfat-reduction options don't. Unlike liposuction, a surgical procedure that causes bruises, redness, and swelling, and weeks of downtime, the 10DMaxlipo Master Laser is a cold fat removal treatment that causes no bruisingor swelling, no side effects, and has no downtime. It uses low-level laser light to penetrate the skin and break down fat. The treatment is non-invasive, with no discomfort or pain, and none of the risks associated with a surgical procedure such as liposuction.

Other popular noninvasive procedures use fat freezing to break down fat generally involve more discomfort than laser fat removal treatments and in some cases require 60–90 days post treatment to see optimal results. The 10D Maxlipo Master Laser is the only laser fat loss option F*A Market Cleared to treat patients with BMIs up to 40. Cleared to treat the entire body, it reduces fat that

To make the treatment effect more efficient

System Specification

Maximum reach of laser head	110cm
Angle adjustable of laser wings	100 degree
Weight of laser head	12kg
Maximum reach of Elevator	500mm
Size of screen	12.1 inches
Power of diode	200mw
Wavelength of diode	532nm
Voltage	90v-240v
Power	120w
Number of diode	10pcs
